Description

Design Description

YOTTSU A Steel is a contemporary interpretation of minimalist design, where geometric form meets the elegance of a steel finish. The lamp's slender, horizontal body draws attention with its clean lines and precisely refined proportions. The metallic "Steel" finish lends the fixture a technical yet refined character, making it a perfect fit for modern interiors, spaces inspired by industrial aesthetics, and architecturally expressive environments.

The lamp's elongated silhouette emphasizes the horizontal layout of the interior, introducing visual order and subtle dynamics. Its minimalist design does not dominate its surroundings but harmoniously complements the other furnishings. The steel finish blends beautifully with concrete, natural wood, glass, and stone, creating a cohesive whole in both understated, monochromatic designs and interiors that combine a variety of textures and materials.

YOTTSU A Steel is a light fixture that combines practicality with decorative appeal. Its elongated form makes the lamp a striking element of the spatial composition, while retaining the visual lightness characteristic of contemporary minimalism.

Lamp Components and Functionality

The YOTTSU A Steel lamp is crafted from metal and aluminum, ensuring a sturdy construction and an aesthetic, modern finish. The steel color scheme emphasizes the fixture's technical character and lends it a timeless elegance. The materials used harmonize well with the design's simple geometry, highlighting its clean lines and meticulous craftsmanship.

The fixture is equipped with a built-in 14.4 W LED light source, powered by 24 V. The high color rendering index (CRI 90) allows for accurate reproduction of the colors of objects and materials, ensuring that the illuminated interior retains a natural appearance. The integrated LED technology provides a functional solution that eliminates the need for replaceable bulbs.

The lamp has a total length of 160.5 cm, a width of 100 cm, a depth of 25 cm, and a height of 8 cm. Its slender body is suspended from two 150-cm-long steel cables, which ensure a stable suspension and emphasize the lightness of the structure. A 150-cm-long gray polyester-braided cord is an integral part of the installation. The whole is complemented by a steel ceiling cover measuring 80 × 5 cm, which neatly organizes the mounting elements.

Its well-thought-out design makes YOTTSU A Steel a perfect fit for spaces where both the quality of lighting and the visual cohesion of the furnishings are important. Its elongated form helps emphasize the furniture layout and define the interior's visual axis, while the neutral steel color offers great design flexibility.

Application and IP20 Protection Rating

YOTTSU A Steel was designed for lighting modern residential and commercial interiors. Its elongated form works well above a dining table, kitchen island, or large countertop, where it is important to visually organize the space and align the lighting with the horizontal layout of the furniture. The lamp can also serve as a striking design element in a living room, home office, conference room, or modern office space.

The steel finish blends perfectly with minimalist, industrial, and modern interior designs. When paired with black, gray, and concrete, it emphasizes the raw character of the interior, while when combined with wood and warm wall tones, it creates an interesting contrast in materials.

The IP20 protection rating means that the fixture is intended for use in dry indoor environments, in areas not exposed to direct contact with water. As a result, YOTTSU A Steel can be used in living rooms, dining rooms, kitchens, and offices, provided the installation location is chosen appropriately.

Minimalist design and modern LED technology

YOTTSU A Steel is designed for those seeking lighting with a distinctive yet understated aesthetic. The combination of metal and aluminum, a steel finish, and an integrated LED light source creates a cohesive design in which every element is dedicated to simplicity and functionality.

The built-in 14.4 W LED lighting with a Color Rendering Index (CRI) of 90 combines modern technology with a focus on light quality. The slender silhouette, steel suspension cables, and matching ceiling cover complete the design, giving the fixture an architectural character.

By choosing YOTTSU A Steel, you're opting for lighting that not only serves a practical purpose but also helps define the character of your interior. It's a minimalist detail with a distinctive form that highlights a modern design aesthetic and introduces a clean, elegant line of light into the space.

Key Features

- Steel finish – an elegant, metallic shade that complements contemporary interiors.

- Durable materials—construction made of metal and aluminum.
- Integrated LED light source – a built-in 14.4 W LED module.
- High color rendering index – CRI 90 for natural color reproduction.
- 24 V power supply – low-voltage power system.
- Elongated design – ideal for use above a table, kitchen island, or long countertops.
- Steel suspension cables—two cables, each 150 cm long.
- Refined details—a gray polyester-braided cable and a steel ceiling cover.
- IP20 protection rating – intended for dry indoor environments.

3000K LED strip specifications:

- LED type: 2835 SMD
- Luminous flux: 2900 lm/m
- Power: 24 W/m
- Voltage: 24 V
- IP20

4000K LED strip specifications:

- LED type: 2835 SMD
- Luminous flux: 3115 lm/m
- Power: 24 W/m
- Voltage: 24 V
- IP20

LED strip power supply specifications:

- Output voltage: 24 V
- power: 20W

Technical information

Light source included	Yes
Type of light source	LED
Max wattage	14,4W
IP degree	IP20
Cable/-s lenght	150cm
Cable lenght	150cm
Width	100cm
Height	8cm
Depth	25cm
Length of the ceiling slat	80cm x 5cm
Made of	stal nierdzewna szczotkowana
Colour	stainless steel (Steel)
Cable color	grey
Braid type	polyester
Warranty	5 years
Comments	custom-made product

Type / function	ceiling lamp, pedant lamp
Power supply	~230V, 50/60 Hz

Other finishes
