Description

Design Description

EPLI ST is a table lamp that proves that simplicity can have a strong decorative expression. Its form is a combination of minimalist geometry with a refined finish - a large, milky white glass shade rests on a cylindrical metal base, creating a modern, harmonious silhouette. The contrast between the structured black of the base and the velvety light coming out of the shade builds an effect of coziness and elegance at the same time.

The EPLI ST design was created for those looking for atmospheric light for the bedroom, living room or office - light that does not dominate, but builds atmosphere. It is an excellent choice for lovers of monochromatic design and sophisticated minimalism.

Lamp components and functionality

EPLI ST is a table lamp with a height of 40,6 cm, made of powder-coated metal and blown glass. The lampshade with a diameter of 27 cm and a height of 30,9 cm emits soft, diffused light that does not glare the eyes.

The length of the braided cable is as long as 150 cm, making it convenient to use even far away from power sources. It comes with a black plug and switch, which discreetly completes the whole.

The luminaire is equipped with a standard E27 thread, compatible with energy-saving LED bulbs of up to 15W.

Application and IP20 protection class

Thanks to its compact but firm form, EPLI ST will be perfect on a bedside table, dresser, desk or coffee table. It can also serve as an auxiliary lamp or mood decorative lighting in commercial spaces - such as hotels, boutiques or lobbies.

The lamp is IP20-rated, which means that it is designed for indoor, dry use only.

Handcrafted and unique character

Each lamp in the EPLI series, including the ST model, is handmade with attention to quality and detail. The glass lampshade is created through a glass blowing process, making each piece slightly different and absolutely unique. The structured metal surface, powder-coated, not only emphasizes the industrial character of the lamp, but also provides it with greater resistance to scratches and damage.

EPLI ST - key features

- Table lamp from the EPLI collection - minimalist form and soft light.
- A large milk-white glass lampshade (Ø27 cm) gently diffuses the light.
- Sturdy metal base powder-coated in black (Jet Black RAL 9005) or white (Signal White RAL 9003).
- Textile braided cable 150 cm long, terminating in a plug with a switch.
- E27 thread - possibility to choose different light sources (max 15W LED).
- Protection class IP20 - for indoor use, in dry areas.
- Ideal for a bedside table, dresser, desk or windowsill.
- Part of the larger EPLI collection - you can easily put it together with lamps from the EPLI and EPLI MINI series.

Epli Collection

The **EPLI** collection is a well-thought-out set of lighting fixtures that allows you to create a coherent, harmonious arrangement in the entire interior - from the living area, to leisure zones, to utility and commercial spaces.

The basic series includes several models, varying in function and proportion. The classic **EPLI pendant lamp** is an ideal choice over the dining table, kitchen island or for point suspension - it introduces a distinctive accent and soft, diffused light. Its second version - **EPLI B** - is perfectly suited to spacious, high interiors, where the form of the lamp can resound in all its glory. The collection is also complemented by **EPLI ST**, a standing lamp that looks great on a bedside table, console or dresser. This is a model that will easily find its way into both the bedroom and the living room.

With more compact spaces in mind, **the EPLI MINI collection** was also created - retaining the styling of larger models, but in a smaller size. This is an excellent alternative for interiors where every centimeter counts, and the light is still to play a decorative and functional role. The EPLI MINI series includes the compact **EPLI MINI** pendant lamp, the small **EPLI MINI ST** standing lamp, the **EPLI MINI W** wall lamp, as well as multipoint solutions: the **EPLI MINI 3P** plafond and the **EPLI MINI 3L** strip lamp.

With such a variety of models, **the EPLI collection** offers full freedom in lighting design - it allows you to consistently build the atmosphere of an interior and create light compositions that are both aesthetically pleasing and functional.

Technical information

Light source included	None
Screw type	E27 LED
