Description

Design Description

YOTTSU B Steel is a contemporary interpretation of minimalist Italian design from the 1990s, in which simplicity of form is combined with bold geometry and attention to every detail. The lamp's horizontal, elongated body draws the eye with its clean lines and distinctive construction, giving the fixture a sculptural quality. The Steel finish emphasizes its modern aesthetic, introducing a subtle elegance inspired by architecture and industrial design into the interior.

The lamp's geometric form was designed to combine visual lightness with a striking presence in the space. The slender body, suspended on thin steel cables, gives the impression of an architectural element floating in the air. The distinctive opening in the luminaire's structure adds depth and dynamism, and the light becomes an integral part of the interior composition. As a result, YOTTSU B Steel not only illuminates the space but also emphasizes its proportions and lends it a unique character.

The steel finish gives the lamp a timeless, technical look that harmonizes perfectly with concrete, glass, stone, and natural wood. The fixture fits perfectly into modern minimalist and industrial designs, as well as interiors where premium materials and precisely designed details play a key role. Its elongated silhouette helps visually organize the space, creating a harmonious composition above a table, kitchen island, or large countertop.

Lamp Components and Functionality

The YOTTSU B Steel pendant lamp is made of metal and aluminum, ensuring a sturdy construction and an aesthetic finish. The steel color scheme emphasizes the minimalist character of the design, and the refined proportions make the fixture an elegant addition to both residential and commercial spaces.

The light source is an integrated 19.2 W LED module with a Color Rendering Index (CRI) of 90. The high CRI promotes natural color rendering, preserving the authentic appearance of materials, furniture, and decor. The use of built-in LED lighting ensures a cohesive design and eliminates the need for replaceable bulbs. The lamp operates on a 24 V power supply.

The YOTTSU B Steel model has a total length of 160.5 cm, a width of 120 cm, a depth of 25 cm, and a height of 8 cm. Its elongated form effectively accentuates the horizontal layout of the space while maintaining a sense of visual lightness. The fixture is suspended from two 150-cm-long steel cables, which emphasize its subtle character and allow for an aesthetically pleasing suspension.

The design is complemented by a 150 cm long gray polyester-braided cord and a steel ceiling cover measuring 100 × 5 cm. The suspension elements and the ceiling cover form a cohesive composition, highlighting the lamp's minimalist aesthetic and visually organizing its installation.

The name YOTTSU comes from Japanese and means the number four. The collection's name is inspired by the four-leaf clover—a symbol of luck, harmony, and uniqueness. Its natural symmetry serves as a reference point for the design concept, in which light, form, function, and emotion come together as a cohesive whole. In this context, the lamp becomes more than just a source of light—it is an element that organizes the space and highlights its individual character.

Application and IP20 Protection Rating

YOTTSU B Steel was designed for modern interiors where lighting serves both practical and decorative purposes. Its elongated form is perfect above a dining room table, a kitchen island, or a large countertop. It can also serve as a striking feature in a living room, study, conference room, or modern office.

Thanks to its 120-cm width, the lamp looks great in more spacious rooms, where it can highlight the furniture layout and define the visual axis of the interior design. The steel finish harmonizes beautifully with a neutral color palette, raw materials, and modern architectural details. Pairing it with wood, on the other hand, creates an interesting contrast between the metallic surface and the natural texture of the material.

The IP20 protection rating means that the fixture is intended for use in dry indoor environments without direct exposure to water. As a result, the YOTTSU B Steel is well-suited for living rooms, dining rooms, kitchens, and office spaces, provided it is installed in an appropriate location.

The lamp can be used as a standalone lighting accent or as part of a larger lighting arrangement. Its minimalist form allows it to be paired with other fixtures of a similar aesthetic, creating cohesive and well-thought-out arrangements.

Handcrafted and Unique

The YOTTSU collection combines a modern approach to design with attention to detail and craftsmanship. Simple geometry, carefully selected materials, and a consistent finish ensure that the lamp retains a timeless character and fits well into a variety of architectural concepts.

The steel version of YOTTSU B stands out with its striking metallic finish and elongated form, which allows you to create interior compositions using light

and geometry. It is an ideal choice for those seeking lighting that combines functionality with modern design, without unnecessary embellishments or random details.

YOTTSU B Steel is not just a pendant light, but also a deliberate element of interior design. It combines minimalist elegance, the technical character of steel, and modern LED technology, giving the space a structured, architectural rhythm.

Key Features

- Minimalist design – a modern form inspired by 1990s Italian design.
- Steel finish – metallic color scheme that emphasizes the fixture's contemporary character.
- Durable materials – crafted from metal and aluminum.
- Integrated LED light source – built-in 19.2 W module.
- High Color Rendering Index (CRI) of 90 – natural color reproduction.
- 24 V power supply – a modern power system.
- Elongated design—120 cm wide, ideal above a table, kitchen island, or large countertops.
- Steel suspension cables—two 150-cm-long cables.
- Aesthetic details—a gray cable with a polyester braid and a steel ceiling cover.
- IP20 protection rating—for use in dry indoor environments.

3000K LED strip specifications:

- LED type: 2835 SMD
- luminous flux: 2900 lm/m
- Power: 24 W/m
- Voltage: 24 V
- IP20

Specifications for the 4000K LED strip:

- LED type: 2835 SMD
- Luminous flux: 3115 lm/m
- Power: 24 W/m
- Voltage: 24 V
- IP20

LED strip power supply specifications:

- Output voltage: 24 V
- power: 36W

Technical information

Light source included	Yes
Type of light source	LED
Max wattage	19,2W
IP degree	IP20
Cable/-s lenght	150cm
Cable lenght	150cm

Width	120cm
Height	8cm
Depth	25cm
Length of the ceiling slat	100cm x 5cm
Made of	stal nierdzewna szczotkowana
Colour	stainless steel (Steel)
Cable color	grey
Braid type	polyester
Warranty	5 years
Comments	custom-made product
Type / function	ceiling lamp, pedant lamp
Power supply	~230V, 50/60 Hz

Other finishes
