Description

Design description

ENKEL W is a wall sconce that combines minimalist design with functionality and quality workmanship. It fits in with the aesthetics of the entire ENKEL collection - inspired by the Nordic approach to design: simplicity, clarity of form and attention to detail.

Its clean, geometric shape, metal shade and matte, structured finish in deep black (Jet Black RAL 9005) or white (Signal White RAL 9003) make it an elegant but unobtrusive wall accent. It's lighting that doesn't scream form - but fits easily into consciously designed interiors.

Lamp components and functionality

The ENKEL W wall lamp consists of a single metal lampshade with a diameter of 17 cm, set on a short, straight arm. The lampshade is adjustable, which allows you to freely direct the light beam - ideal for reading, illuminating a selected zone or creating a cozy atmosphere.

The whole is mounted to the wall with a round bezel with a diameter of 12 cm, maintained in the same color scheme as the luminaire. The textile

braided cable adds a subtle designer character to the lamp.

The light source is a classic E27 thread, which allows a wide choice of bulbs - from traditional to decorative LED. The maximum power is 15W LED, which provides effective and energy-efficient lighting.

Application and IP20 protection class

ENKEL W will be perfect as supplementary or spot lighting in the bedroom (e.g. by the bed), living room, corridor or commercial spaces such as hotels and restaurants. With the ability to adjust the direction of light, the lamp is both practical and stylish.

The IP20 waterproof rating means that the wall lamp is designed for use indoors in dry areas.

Handmade and unique character

Each piece of ENKEL W is assembled by hand - with attention to detail, proportion and quality of finish. Structural painting of the metal not only gives the fixture elegance, but also increases its resistance to minor damage. This wall lamp is designed for durability and timeless style.

ENKEL W - key features

- Wall lamp / wall lamp from the ENKEL collection.
- Adjustable metal shade Ø17 cm, powder-coated in black or white.
- Textile braided cable.
- E27 thread - max 15W LED.
