Description

Design Description

Luoti ST is a minimalist table lamp with a unique, eye-catching form. The milky white sphere gently floats above the massive metal base - as if balancing on the verge of levitation. The distinctive shape creates the visual illusion that light is floating above the surface of the furniture. It's a design full of simplicity, yet design boldness. The table version is a mirror image of the hanging Luoti - here the sphere has found a stable support on a desk, dresser or bedside table. The name "Luoti" comes from Chinese and means "naked" - this lamp does not need unnecessary ornamentation to impress.

Lamp components and functionality

Luoti ST is made of metal and glass, which ensures durability and an elegant appearance. The milky white glass shade with a diameter of 15 cm diffuses the light, creating a soft, cozy aura. The solid base is covered with a structured lacquer, which contrasts well with the lampshade. The long polyester braided cable (150 cm) is terminated with a black plug and a switch, which allows you to conveniently control the light. The lamp is equipped with a G9 socket and is suitable for LED light sources up to 12W.

Application and IP20 protection class

Luoti ST lamp is best found in spaces where mood light is important: on desks, bedside tables, consoles or dressers. It will be perfect in a study, bedroom or living room, especially in arrangements inspired by Japanese, modern or minimalist styles. IP20 rating means that the lamp is intended for indoor use only.

Handcrafted and unique character

Each Luoti ST lamp is the result of craftsmanship - from the precisely lacquered base to the carefully fitted lampshade. Manufactured in Poland, it features not only refined aesthetics, but also durability. With a variety of colors (black, white, navy blue, pink), you can match it to the individual character of the interior.
