Description

Harmony born from the balance of forms... This is how we would describe the OIO collection by UMMO. The construction is based on two balls - glass and wooden - connected on a stick, and a small, dancing metal disc between them. The economical design of the OIO lamps will harmoniously fit into the existing decor and add style to it. Suspended and wall luminaires in this series are available with single LED light sources, so they are perfect for grouping. The collection is the perfect culmination of minimalist arrangements, especially those in the japandi style.
