Product code: **EP0111PO**

EAN: **5906733722255**

## Description

### Design description

EPLI is a pendant lamp that brings purity of form and softness of light to the interior. In its white version - with a subtle contrast between milky glass and matte, structured metal - it gains a unique lightness and freshness. It is a luminaire created for lovers of monochromatic design and interiors where light plays a prominent role.

The large, milky-white blown glass shade with a diameter of 27 cm beautifully diffuses light, creating a cozy, non-aggressive atmosphere - ideal for rest zones and spaces designed to promote relaxation. The metal covers enclosing the shade add elegance to the form and protect it from direct light glaring.

Hung over a table, in a living room or over a kitchen island, the white EPLI doesn't just illuminate - it brings visual harmony and modern lightness. And if you love the style, you can complement it with the EPLI ST table model, creating a harmonious duo of light and aesthetics.

## Lamp components and functionality

EPLI is a lamp made of a combination of white metal (Signal White RAL 9003) and milk glass. The glass shade (Ø27 cm, height 30.9 cm) conceals a light source with an E27 stem (max 15W LED), which subtly shines through the frosted glass. The effect? Diffused, friendly light - no shadows, no glare.

The luminaire is suspended from two white textile braided wires (120 cm long), which can be adjusted to the height of the room. The whole is fixed to the ceiling with a discreet white soffit with a diameter of 14 cm.

The total length of the lamp is 140 cm - suitable for both standard and higher height interiors.

## Application and IP20 protection class

EPLI in white will perfectly fit into bright, minimalist arrangements - from Scandinavian style, through Japanese, to modern soft loft. Its calm form and soft light make it an ideal choice for dining rooms, living rooms, bedrooms, kitchens, as well as commercial spaces - restaurants, showrooms or boutiques.

With an IP20 rating, the lamp is designed for use in dry interiors.

## Handmade and unique character

Each piece of EPLI lamp is created in the process of hand-assembly, with attention to detail and aesthetic finish. The blown glass lampshade gives the lamp its individual character and unique quality. The white structural painting of the metal parts increases the resistance of the surface to scratches, and emphasizes the lightness and subtlety of the whole form. This is a product designed for durability, functionality and the beauty of everyday light.

### EPLI - key features

- Pendant lamp with a delicate, monochromatic character.
- Milky white glass shade Ø27 cm, length 30,9 cm.
- Metal headliner Ø14 cm in white (Signal White RAL 9003).
- Materials: glass, metal, textile cable (polyester).
- Braided wires, length 120 cm - total length: 140 cm.
- Protection class IP20 - for dry rooms.
- Handmade, blown glass, elegant details.
- Also available as a table lamp (EPLI ST) and a pendant lamp (EPLI B) - the possibility of creating a coherent light arrangement.

EPLI - light that soothes. Form that soothes. Design that stays.

## Epli Collection

The **EPLI** collection is a well-thought-out set of lighting fixtures that allows you to create a coherent, harmonious arrangement in the entire interior - from the living area, to rest areas, to utility and commercial spaces.

The basic series includes several models, varying in function and proportion. The classic **EPLI pendant lamp** is an ideal choice over the dining table, kitchen island or for point suspension - it introduces a distinctive accent and soft, diffused light. Its second version - **EPLI B** - is perfectly suited to spacious, high interiors, where the form of the lamp can resound in all its glory. The collection is also complemented by **EPLI ST**, a standing lamp that looks great on a bedside table, console or dresser. This is a model that will easily find its way into both the bedroom and the living room.

With more compact spaces in mind, **the EPLI MINI collection** was also created - retaining the styling of larger models, but in a smaller size. This is an excellent alternative for interiors where every centimeter counts, and the light is still to play a decorative and functional role. The EPLI MINI series includes the compact **EPLI MINI** pendant lamp, the small **EPLI MINI ST** standing lamp, the **EPLI MINI W** wall lamp, as well as multipoint solutions: the **EPLI MINI 3P** plafond and the **EPLI MINI 3L** strip lamp.

With such a variety of models, **the EPLI collection** offers full freedom in lighting design - it allows you to consistently build the atmosphere of an interior and create light compositions that are both aesthetically pleasing and functional.

## Technical information

Light source included	None
