Description

Design description

The EPLI MINI W wall lamp is an elegant variation on the theme of classic forms, fitting into modern design with a touch of subtle minimalism. Its streamlined, graphic silhouette is based on a harmonious combination of milky white glass and black metal details. The EPLI collection is inspired by the form of a capsule - rounded, soft, yet precisely defined. The lampshade, shaped like a slightly flattened sphere, is wrapped from the top and bottom with vertical bars that give the lamp clarity and character. This is a lamp that acts both as a subtle accent and a strong element of the interior composition.

Lamp components and functionality

EPLI MINI W consists of a milky white glass shade with a diameter of 17.5 cm and a height of 22.4 cm, mounted on a vertical structure made of powder-coated metal in black or white. The wall lamp is mounted to the wall with an elongated bracket, also in black or white structure, which stabilizes the form and completes its geometric purity.

The light source hidden inside the shade (G9 thread, max 12W LED) gives a soft, even light, ideal for building a cozy atmosphere. The lamp works directly when connected to the electrical system and does not require additional fixtures.

Application and protection class IP20 / IP44

EPLI MINI W wall lamp is perfect for relaxation areas, corridors, bedrooms, bathrooms (with IP44 version), as well as commercial spaces such as hotel lobbies, restaurants or boutiques. Its universal color scheme and modern yet timeless form make it a perfect match with both Japanese, modern and minimalist arrangements.

The available IP20 version is designed for dry interiors, while the model with IP44 can be safely used in areas with higher humidity (such as bathrooms).

Handcrafted and unique character

Each EPLI MINI W wall lamp is created in a hand-assembly process with attention to the smallest details. High-quality glass and precision-finished metal parts are powder-coated, which guarantees durability and aesthetics for years to come. UMMO, as always, focuses on quality, functionality and distinctive style that does not succumb to seasonal fads.

EPLI MINI W - key features

- Wall lamp from the EPLI collection by UMMO.
- Glass lampshade in milky white color (Ø17,5 cm x 22,4 cm).
- Construction in powder-coated metal.
- Mounted on the wall with an elongated structural bracket.
- Light source: G9, max 12W LED.
- Protection class: IP20, IP44.
- Color: white (Signal White RAL 9003), black (Jet Black RAL 9005).
- Overall height: 45.6 cm | Depth (from wall): 23.3 cm.
- A stylish accent piece for bedrooms, hallways, living rooms and commercial spaces.
- Handcrafted and timeless form.

EPLI MINI Collection

The EPLI MINI collection is a series of lamps designed for smaller spaces that need functional yet aesthetically pleasing lighting. EPLI MINI models retain the distinctive design of the larger EPLI lamps, offering compact forms and subtle, diffused light. The series includes the EPLI MINI small pendant lamp, the EPLI MINI ST table lamp, the EPLI MINI W wall lamp, as well as multi-point solutions - the EPLI MINI 3P plafond and the EPLI MINI 3L ceiling strip, which allow you to create cohesive lighting compositions in small interiors.

The EPLI MINI collection can be an excellent complement to the EPLI collection - the original series that forms the basis of the entire EPLI family of lamps. This set includes fixtures ideal for lighting both homes and commercial spaces. The collection includes a single EPLI pendant lamp, a second version of the EPLI B pendant lamp and the EPLI ST table lamp. The EPLI models are distinguished by their lightweight form and milky white glass shade, which subtly diffuses the light to create a pleasant and warm atmosphere.

Both collections allow you to create a harmonious, functional and aesthetically pleasing lighting arrangement to suit a variety of interior needs and sizes.
