Description

Design description

KUUL E is a tribute to simplicity and harmony of form. Its geometric body is based on a perfect sphere, gently "pressed" by a flat metal bowl. Such a contrast creates a modern yet subtle silhouette, which will fit perfectly in many interior styles - from japanese to minimalism to modern loft. Soft light penetrating through the milky white shade creates a pleasant mood and emphasizes the aesthetic qualities of the fixture.

Lamp components and functionality

The lamp is made of high-quality powder-coated metal and opal glass. The lampshade with a diameter of 30 cm gives the lamp a visual lightness, and at the same time provides adequate dispersion of light. The total length of the fixture is 130 cm, of which the polyester braided cord is 97.5 cm long - it can be easily adjusted to the height of the room. The E27 socket allows the use of standard LED bulbs up to 15W - this is functionality and freedom in the choice of light source.

Application and IP20 protection class

KUUL E was designed for dry interiors, such as living room, bedroom, dining room or commercial space. The IP20 protection class means that the lamp is not suitable for damp rooms, but it is perfect for places where atmosphere, aesthetics and refined details matter.

Available in three color variants - black (RAL 9005), white (RAL 9003) and burgundy (RAL 3004) - makes it easy to match it with different interior color concepts. KUUL E looks great solo, as well as in the company of other lamps from the KUUL collection.

Handmade and unique character

Each piece of KUUL E is assembled by hand, with attention to precision and quality of finish. It is not only lighting, but also a decorative element of the interior - for those who are looking for a lamp of remarkable character and high aesthetics.

KUUL E - key features

- Spherical milk-white glass lampshade with a diameter of 30 cm - provides soft, even light.
- Geometric design with a distinctive flat canopy - a modern form that attracts the eye.
- Interchangeable light source with E27 thread - max 15W LED.
- Three color options: black (RAL 9005), white (RAL 9003) and burgundy (RAL 3004) - to match different arrangements.
- IP20 rating - ideal for dry residential and commercial interiors.
- Manual assembly - high quality workmanship and attention to detail.
- Universal design - will work well in japanese, modern, minimalist, classic and loft styles.
