Description

Design Description

ROKKE WOOD is a wall lamp that represents a dialogue between the heritage of modernist architecture and a fresh look at contemporary design. Its elongated, oval shape is inspired by the simplicity and functionality of pre-war urban concepts of Gdynia, where aesthetics were subordinated to the logic of form. In this version finished in natural wood, the fixture gains an organic tone - light softly reflects off its surface, creating a pleasant, nuanced play of chiaroscuro.

The name ROKKE refers to the Norwegian word for stingray - a sea creature whose movement and form are the source of visual inspiration for this luminaire. The lamp's softly splayed body, with gently sloping lines, evokes the fluid, organic movement of a stingray gliding just above the ocean floor. This subtle motif of nature has been translated into the language of modern design - where streamlined form meets geometric discipline. ROKKE is a lamp with a distinct character, which brings into the interior not only light, but also a sense of fluidity and tranquility.

Lamp components and functionality

The body of the lamp is covered with natural wood veneer, which gives it a warm and cozy character. A decorative metal element in a color from the UMMO palette adds a modern touch and subtle contrast to the lamp.

ROKKE is equipped with two LED light sources with a G9 thread, each with a power of up to 12W, which allows you to adjust the intensity of lighting to your individual needs. The dimensions of the lamp are: 3,8 x 21 x 56,6 cm. These proportions make the lamp look slim and elegant even in a limited space.

Application and IP20 protection class

Thanks to its IP20 rating, ROKKE is ideal for dry areas such as living rooms, bedrooms and corridors. It can serve as accent or auxiliary lighting, adding elegance and modernity to an interior.

Handcrafted and unique character

Each ROKKE WOOD lamp is assembled by hand to order, which guarantees its uniqueness and high quality workmanship. It is an offer for those who appreciate individual approach to design, precision craftsmanship and expressive details.

Thanks to the use of natural wood, this model will especially appeal to lovers of harmonious, balanced interiors - close to the philosophy of hygge, slow living and conscious space design. It is lighting that not only complements the arrangement, but supports the creation of an atmosphere of calm, warmth and authenticity. ROKKE is an excellent choice for those looking for unique lighting for their interior. We invite you to purchase and experience light in a whole new perspective.

Key features

- Modern design inspired by modernism.
- Wide range of trending colors.
- Protection class: IP20 - for indoor use.
- Hand assembled to order - each piece is created with attention to detail.
