Description

Design description

Caponio W A is a wall lamp created with subtlety in mind - it does not dominate a space, but gently defines it. Its compact yet expressive form fits perfectly into modern and classic interiors, introducing light that emphasizes the rhythm of the space rather than disrupting it.

Lamp components and functionality

The design is based on the proven aesthetics of the Caponio series: with a minimalist metal lampshade in the shape of a hat. The lamp is offered in RAL 2002 red-orange, RAL 9005 black, RAL 9003 white, RAL 6013 olive, RAL 5014 blue, in combination with milk glass. The shape is inspired by Italian design from the 1960s - functional, but with a touch of poetic softness of modernism. The glass shade gently diffuses light, bringing a warm, friendly mood to the interior, while the metal lampshade - which serves not only an aesthetic but also a shielding function - adds elegance and modern expression to the design. The dimensions of the luminaire are 10.5 x 28 x 28 cm.

Caponio W A has an interchangeable **light source (G9 LED, up to 12 W)**, which gives you full freedom to choose the color and power of the lighting - from a warm, relaxing glow to cool and functional light. This allows you to fully adapt it to the climate of the interior and to your needs.

Application and IP20 rating

It is an excellent choice for bedrooms (on either side of the bed), narrow corridors, office spaces or over the relaxation area in the living room. The wall lamp doesn't take up much space, but it sets the tone for the whole - with light, line and color.

In the case of the Caponio W A wall lamp, the IP20 protection class informs that the luminaire will be great in typically dry areas. Its housing is protected against accidental contact and larger particles, but it does not protect against moisture or water. That's why Caponio W A should not be installed in bathrooms, near sinks, bathtubs or showers, or in outdoor spaces such as a terrace or balcony. It's a wall lamp for indoor use - where aesthetics, proportion and soft light play a primary role.

The Caponio wall lamp goes well with a standing lamp and a pendant lamp from the same series, creating a cohesive, modern lighting set. Such a combination allows to maintain visual continuity in the space, combining ceiling, table and wall lighting into one harmonious composition.

Handmade and unique character

Each lamp is assembled by hand to order, with attention to detail - a carefully crafted product that is made with the individual customer in mind, not the mass consumer.

Caponio W A is more than a wall lamp - it is a sophisticated detail that gives rhythm and depth to the light in your interior. We cordially invite you to purchase it.

What sets it apart:

- Formal references to design classics - a subtle play of modernism and nostalgia of Italian design classics.
- Milk glass - a guarantee of warm, diffused light.
- Hand assembled to order - precision, quality, unique character.
- Compact but distinctive form - an aesthetic accent to any interior.

Technical information

Light source included	None
Screw type	G9 LED
Max wattage	1 x 12W
IP degree	IP20
Length	10.5cm
Width	28cm
Height	28cm
Base diameter	11.2cm
Made of	metal / glossy milk glass
Colour	black (Jet Black RAL 9005)
Lampshade color	white
Diameter of the lampshade	11.2cm
Warranty	24 months
Comments	custom-made product
Type / function	wall lamp, sconce
Power supply	~230V, 50/60 Hz
